

## Fighting fascism

Right-wing political ideas are the opposite of what we want. The terrible experiences of fascism and new right-wing movements show us that we have to be active. That is why we cooperate with others, so that racists and fascists have no space in school yards, streets or even entire neighbourhoods.

Anti-fascism is a must for us and a main principle of our movement: we participate in demonstrations, block Neo-Nazi marches and organize solidarity actions. We visit memorials to remember the victims of fascism and to learn from the past. In seminars and information events we make our opinions, actions and structures known to everybody.

## All over the world to change it!

Capitalism is international; therefore our struggle against the capitalist society must also be an international struggle. We Falcons encounter international solidarity. We want to learn from each other across borders and won't allow that states use us against each other.

International relations and solidarity are important to us. In IFM-SEI (International Falcon Movement) and IUSY (the International Union of Socialist Youth), we cooperate worldwide with other children and youth organizations, who see themselves as part of the socialist movement. Together with our sister organizations we stand against racism and strive for equality of all human beings.

We closely associate internationalism with the question of war and peace, and anti-militarism has always been an essential part of our pedagogy. We always express our solidarity with emancipatory leftist movements around the world. The Falcons in particular maintain close contact with their Israeli and Palestinian sister organizations.

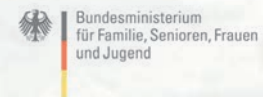

## Join us!

We offer a lot for each age – for children, adolescents and young adults. You feel like being part of a group or experience a camp, you like politics and self-organization? Find out and engage - Join in at the Falcons! Friendship!

[ What we are and what we do! ]

## What we are and what we do!

We demand the end of exploitation of people by other people. We oppose all forms of domination; we are against racism, sexism, homophobia and antisemitism. We criticize the fact that in our world the interests and needs of people do not count, but the freedom of economies.

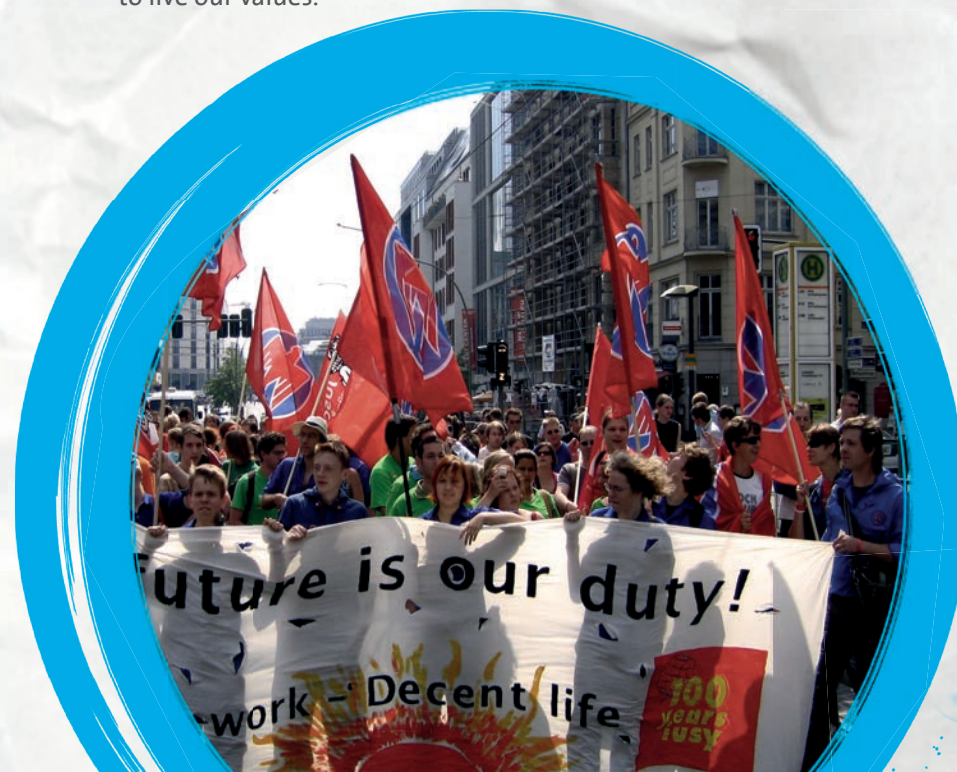

We want to get rid of oppression. Therefore we are anti-capitalists, antiracists and feminists. That is why we are Socialists. Socialism means to us equal and free life.

## Socialism is not just a sound of the future!

The Falcons are a Federation where children and young people can decide on what we do. We are not linked to any party, but neither we are apolitical! We are a leftist organization that fights for a free society. We want a better world for everyone, but especially for children and teenagers!

We meet regularly in groups and discuss everything, both what annoys us and what makes us happy. Together we plan demonstrations and events, workshops, leisure time activities and trips.

We organize camps, where we try to live in harmony with our ideas of freedom and equality. In our youth clubs, seminar houses and camps we create the space to live our values.

## To change the world through education

Our way of doing political work is based on socialist education. Through socialist education we strive to overcome the capitalist society. This means promoting the fight against competition and instead encouraging solidarity between children, adolescents and adults. We educate us and others! We decide what and how we want to learn. Our socialist utopia is the cornerstone of our educational work. Everybody is included in the decision-making and is encouraged to think along and help to shape our movement. We don't want unquestioned hierarchies, but critically-thinking people!

Socialist education is not just a blueprint for us, but a never-ending process in the fight against domination and oppression. Education means for us not just about acquiring knowledge, but to be there for one another and to learn and to fight together!

## Say the dirty word - feminism

The utopia of a real socialist society includes the necessity that all live together in solidarity. We are convinced that feminism is a way to get there. We want that all people count, regardless of their gender. In our society gender—especially being a woman or a girl— is connected to oppression and discrimination. We want to break through the patriarchal structures in which we grow up. This principle of education is what we call co-education.

Co-education means the common education of all genders by all genders, from the perspective of all genders. This approach, which is as old as the Falcons itself, was improved over the years by empowering girls groups, anti-patriarchal work with boys and queer education (against the view that there are only two genders and only heterosexuality).
